

NEW Curriculum Enrichment from the Energy and sustainability team.

Japanese experience

Why not broaden your student's horizons with an Oriental flavour.

Try tasting sushi.

Learn about ancient customs and artefacts.

Try on costumes.

Experience the Awa Odori "Fools" Dance.

Rainforest enrichment.

Are your students studying the rainforest?

With rainforest games, activities, lessons and assemblies booking a rainforest experience gives your students a greater understanding of life in the forest and the threats to it. Enhance your curriculum and mobilise your Eco Warriors to save this vital Ecosystem.

They have been developed in response to school demand and the rising cost of school trips. Both these enrichment days can be used as evidence for progress through the "Eco Schools" award.
