

Teaching resources loan list.

Solar racing cars .

These car kits demonstrate solar power at its best. They require bright sunlight and a flat surface like the school yard in which to operate. Set it up as a team challenge to race the different cars along a route. Box of 12

Energy ray guns.

These ray guns are perfect for your eco team to take heat measurements around school. They are simply designed, and easy to use for all age groups. Finding the hot and cold areas in school can lead you to make adjustments to your heating and warm the school more efficiently. Box of 15

Scheme of learning box.

This resource has a range of lesson plans and activities to cover all aspects of climate change and energy efficiency. The activities come with all resources required for delivery and are organised into lessons that build on the learning week by week.

Eco dolls house

A specially designed and built dolls house to explore the steps that should be taken to live a life with a lower carbon footprint. Comes with a pack detailing each feature of the house and explaining its importance.

We have a range of books, teaching packs and other resources which we can loan and direct schools to supporting their delivery of topics around the themes of the “Eco Schools” award scheme. Please contact us with your requirements.
