

## Schools carbon reduction officers.

This service has supported schools over many years to help them to reduce energy and water costs as well as educate the future generations in their responsibilities to the Planet. We support staff through the Eco Schools scheme and have seen over 70% of North Yorkshire schools signed up to the programme. The events and training we run are always oversubscribed and 'Power down Pete' continues to fly into school as an ever popular super hero to deliver his energy saving message. Schools access this service through the Energy Traded Service Total service offer.

To allow schools to benefit further from this service we are offering an '\*unlimited' service to schools who take our Primary total service offer. Schools can now come to our events, have a visit from Powerdown Pete, access practical energy advice and receive training on a range of topics without any extra charges. By continuing to sign up to the Total Service from the Energy Traded Service they can support schools and help them realise savings year on year.

This is what some schools have said about the service.

'It was a very good assembly and it was suited to everyone.'

Class 1 St Martins school Scarborough

Staff said you were amazing and that the children had a fantastic day! Amotherby school

Thanks for coming and making a normal school morning into 2 Epic hours .

Yr 4 croft school

Relevant, fun and full of learning !

Head teacher Hutton Rudby School

We have been successful in gaining the Green Flag award!!! So thank you for your support and guidance at the last support meeting. We are all thrilled here!

Kirk Smeaton School .

The Total Energy service for your school is the most cost effective way to access the Carbon Reduction Service.

For further information please contact

Or Ruth Stacey at [Ruth.stacey@northyorks.gov.uk](mailto:Ruth.stacey@northyorks.gov.uk)

\* Unlimited is dependent on the officers availability and places on courses and events. Priority will always be given to schools that have yet to access that service.
